An Update on COVID-19 in Chile

This newsletter extends the report to the minor population, according to the vaccination age allowed by the Ministry of Health, from 3 years onwards. More than 43.0 million vaccines have been administered, with 87% of the target population completing the process (65.3% in the population under 18 years and 91.8% in the population over 18 years). Chile stands out for being the country with the largest share of population vaccinated with booster doses, reaching 52 per 100 inhabitants. In total, 10 million booster doses have been administered.
